

INTERFACING MICROCONTROLLER TO CELL PHONE

GRAPHICAL DISPLAY

This project aims is interfacing a Graphical LCD with our Microcontroller. Graphical LCD provides fast access to any and all types of digital media.

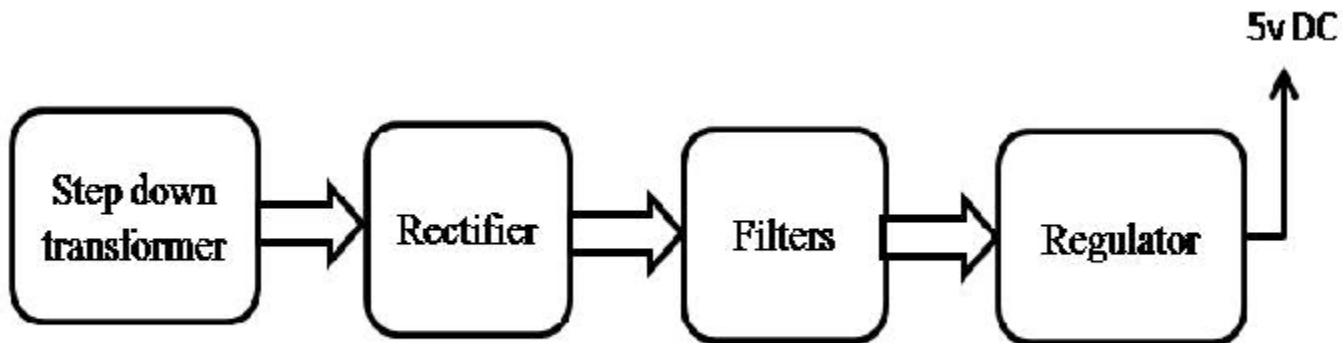

This project gives us the exposure about how to efficiently make use of the graphical screen technology to interface with the appliances in our practical life. It can also be operated very easily so can be used even by very old people and also by the illiterates.

The project mainly consists of a Micro controller which acts as heart of the device. The micro controller is interfaced with a Graphical LCD

Features:

1. Display on Graphical LCD.

Regulated power supply:
